

Geami WrapPak[®] EX MINI

Protect your fragile products
during shipping

Best
sustainable
alternative to
bubble wrap

ABOUT THE SOLUTION

Geami WrapPak Exbox mini is a handy disposable dispenser box that expands die cut kraft paper into a 3D honeycomb structure providing an unique wrapping product.

It protects finished, polished or painted surfaces from marring, scuffing, abrasion and scratching during shipping, handling, and distribution. It is also a great way to create a barrier-layer between products to prevent friction when multiple items are packed together.

- easy installation
- small footprint
- low upfront investment
- no need for tape
- sustainable

PACKAGING NEEDS

The Geami WrapPak EX Mini is highly suitable for smaller packaging environments in which one has to pack items occasionally. For instance, e-commerce startups, small warehouses and retail outlets dealing with limited space and funds.

“This solution is perfect for my recently started e-commerce activities. We needed a compact and highly flexible solution at a limited investment”

“Suzana - Owner webshop”

PRODUCT BENEFITS

- Low up front investment
- Lightweight box to move around the packing area
- Perfect in-the-box presentation enhances the customer’s unboxing experience
